ABOUT US

The Design Exchange is Canada's leading fully immersive event venue featuring industry leading technology for projection mapping, LED surfaces, kinetic lighting and audio-visual.

Located in the heart of Toronto's Financial District, Design Exchange (DX) is more than just an event venue—it's an immersive, one-of-a-kind space where history, design, and technology converge.

Originally built in 1937 as the Toronto Stock Exchange, the DX seamlessly blends heritage architecture with cutting-edge innovations to create unforgettable event experiences.

CONTENT + EQUIPMENT

4

The Design Exchange provides a turn-key content production solution for clients requiring immersive and multi-dimensional content design. Our in-house studio can develop and create content for your event matching your brand and your vision OR, for clients with existing content teams or agencies producing their own content, our team will provide direction and testing services.

The tech at the Design Exchange is managed by:

CCR Solutions - our in-house AV company - who manage all the equipment and will work with client directly (including billing) for all AV equipment EXCEPT the Trading Floor Immersive Equipment which is billed by the Design Exchange.

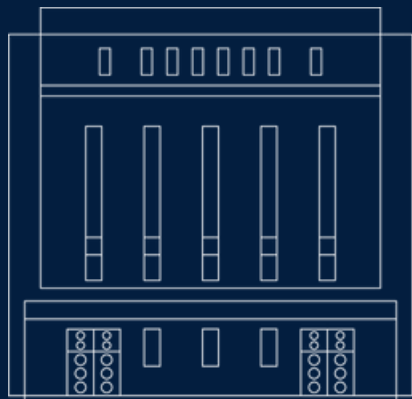

DX In-House Studio - who will provide all content services which are billed by Design Exchange and included on your master contract.

YOUR VISION ...OUR SPACES

For those seeking a truly bespoke experience, our Immersive Content Team stands ready to bring your wildest visions to life. Collaborate with our team of experts to design a custom backdrop that perfectly encapsulates the essence of your event, incorporating interactive elements and cutting-edge technology to create a truly immersive experience like no other. Whether you're planning a wedding, corporate event, or any other special occasion, the possibilities are endless at the Design Exchange. Let us be your partner in creating memories that will last a lifetime.

IMMERSIVE FILE DELIVERY SPECS

FILE FORMATS:

- Acceptable Video Formats: **.MOV or .MP4 (.MP4 preferred for large files)**
- Video Codecs: **H.264, H.265, ProRes**
- Still Image Delivery Format: **.PNG**
- Audio Delivery Format (Stereo/Mono): **.WAV or .MP3**
- For client supplied content please include all linked files (images, videos, logos, fonts, etc)

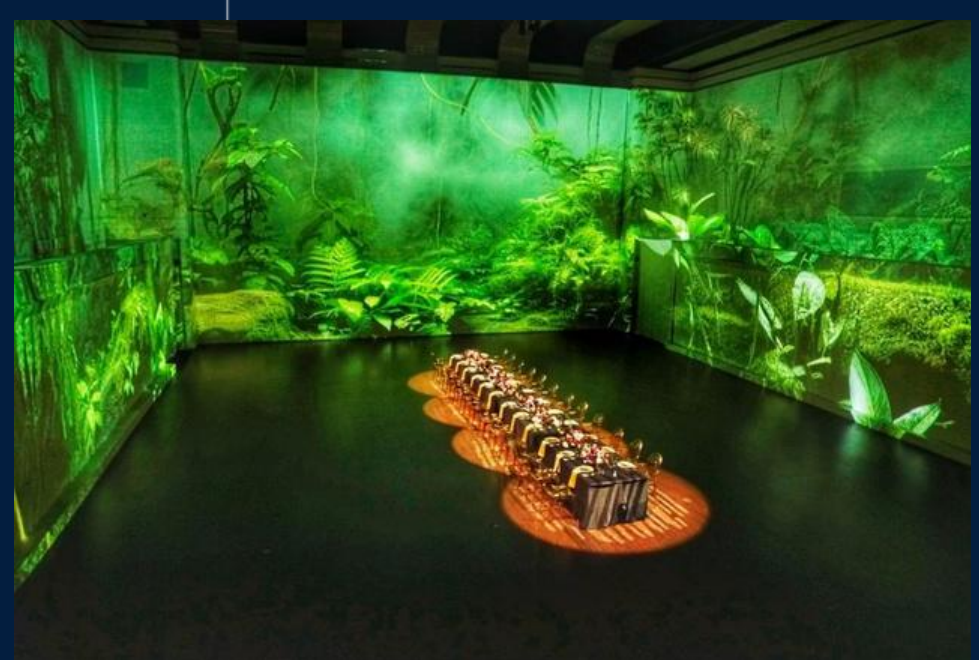

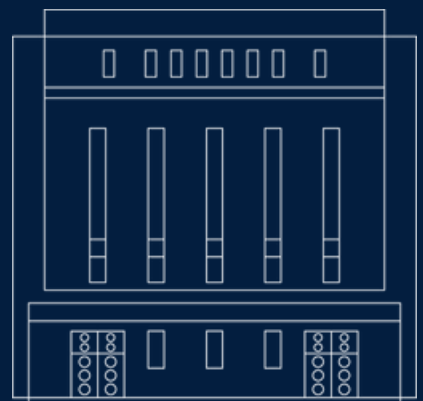

FILE TRANSFERS & DEADLINES:

- Final test files required minimum 2 weeks prior to event date
- Final files required minimum 3 business days prior to event date (or earlier in peak periods)
- All files to be sent via WeTransfer using link - <https://design-exchange.wetransfer.com>
- Once you have uploaded files please email immersive@eatertainment.com

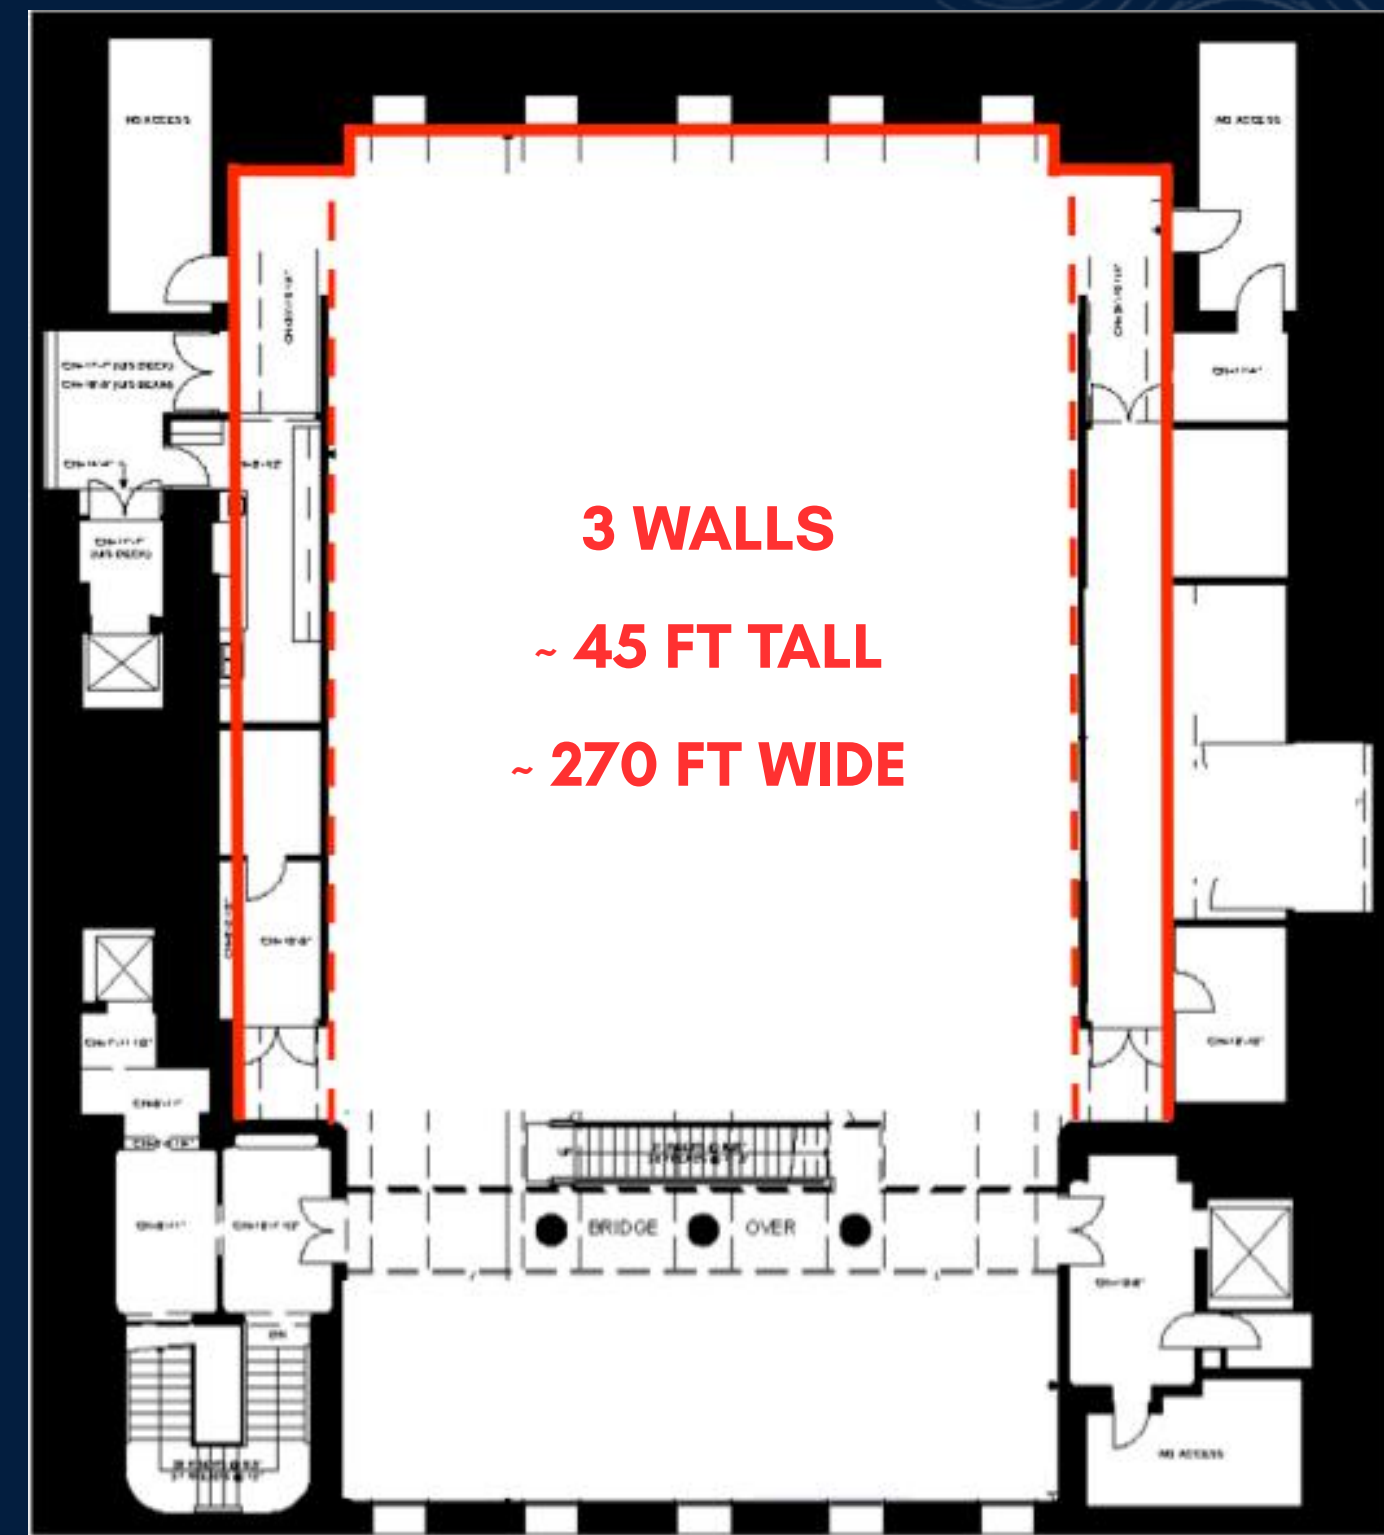

Please note that Design Exchange does not take responsibility for how client provided content is displayed.

TRADING FLOOR

IMMERSIVE PROJECTION RECOMMENDATIONS

FILE FORMAT RECOMMENDATIONS:

- Final video file must be provided in full edge-to-edge size of 6872 pixels x 1080 pixels.
- Please embed audio file both into the video file and separately as backup.
- Please note that for video content isolating different areas/surfaces we recommend providing a 'flattened' single file along with one file for each layer. For layers that only use a portion of the surface please include an 'alpha channel' to ensure transparency of those layers.

NOTES:

- For best results, use custom aspect ratio (listed above) to reduce the need for scaling.
- Keep key graphics and text a minimum of 50 pixels away from logo/text safe areas to ensure visibility.
- Words/crucial content need to be a minimum of 150 px above the south and north cubes to be visible.
- The West 'Domino' Wall screen is slightly angled. If left square, the bottom corners will spill off the domino screen.
- As the mapped area has different depths and surface materials avoid having logos, text and images overlap from section to section unless the content specifically is designed to do so.
- Images and video will show best when 6k original content is used, 4k content will work too but may not be high resolution, anything under 4k may be pixelated and/or blurry.
- For client provided content there will be a cost for loading, rendering and testing content. This cost is determined by the quantity, length and formats of content.

TRADING FLOOR

OTHER IN-HOUSE TECH

Partial list only, CCR Solutions offers a wide array of additional audio, visual and staging equipment from it's local warehouse and a custom shop to produce backdrops, stages and more complex installations.

LIGHTING:

- 24 x LED Moving Head, ADJ Focus Spot 5Z
- 32 x DMX Controlled Kinetic lights on 90ft DMX controlled winch cables and console (see next page)
- 48 x Astera LED Uplights
- 8 x Daylight LED Lekos
- 12 x Colour Chorus LED Uplights
- MA2 on PC Kit Lighting Console

AUDIO:

- DX Powered Speakers, QSC KLA12, DX- Powered Subs, QSC KLA181-B, K12 Speakers
- Soundcraft Si Expression 3 Digital 32ch Mixer
- Wireless handheld and lav mics

OTHER:

- 2 Camera Sony 4K Robo Cam Broadcasting / Streaming system
- 8 x 6 stage risers (5) with skirting, drape panels, etc
- 8k Laser Projector, Fog Hazer, 55 TV Monitors on stands
- Wireless handheld and lav mics

PROJECTION WALL + LED WALL RECOMMENDATIONS

FILE FORMAT RECOMMENDATIONS - PROJECTION WALLS:

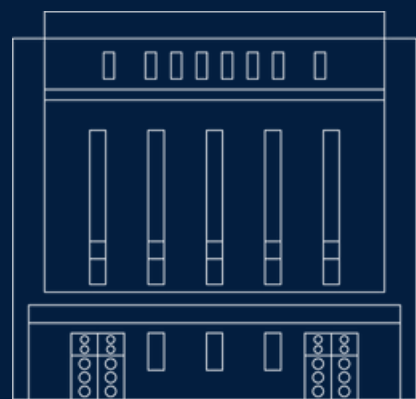

- Final video file must be provided in full edge-to-edge size of 7015 pixels x 1080 pixels.
- Please embed audio file both into the video file and separately as backup.
- Please note that for video content isolating different areas/surfaces we recommend providing a 'flattened' single file along with one file for each layer. For layers that only use a portion of the surface please include an 'alpha channel' to ensure transparency of those layers.

FILE FORMAT RECOMMENDATIONS - LED WALLS:

- System is standard 16:9 format (1920 x 1080) and can accept video, still image (png), or PPT files.
- All files should be supplied directly to CCR Solutions for playback. Please see page 18 for CCR contact details.

NOTES:

- For best results, use aspect ratios (listed above) to reduce the need for scaling.
- Keep key graphics and text a minimum of 100 pixels away from edges.
- Images and video will show best when 6k original content is used, 4k content will work too but may not be high resolution, anything under 4k may be pixelated and/or blurry.
- For client provided content there will be a cost for loading, rendering and testing content. This cost is determined by the quantity, length and formats of content.
